ABOUT ME

Information Technology student with hands-on experience in IT support, local networking, and software development. Building a foundational understanding of hardware assembly and IoT solutions using ESP32. Eager to bring my troubleshooting skills to a dynamic team while actively learning from industry professionals and growing alongside the company.

PROJECTS

SARI-SARI STORE MANAGEMENT SYSTEM - (TINDAHAN)

Personal Project | Dev Support — October 2026 - Present

- Developed a store management web application using React and TypeScript to streamline daily inventory and POS operations for local businesses.
- Built point-of-sale and credit (utang) tracking modules to digitize manual sales reporting and improve debt collection tracking.
- Configured Firebase cloud storage and authentication to secure user data and enable reliable, real-time remote access.

JOLLYISLAND MANAGEMENT SYSTEM

Capstone Project | Main Dev — July 2026 - October 2026

- Engineered an IoT playtime tracking system using ESP32 microcontrollers and wireless pagers to accurately monitor and manage customer session times.
- Built a responsive administrative web dashboard with React and Tailwind CSS to provide staff with real-time monitoring and control over active play zones.
- Troubleshoot and assembled ESP32 hardware prototypes with RFID readers to ensure seamless data transmission between physical devices and the cloud database.

SMNHS LIBRARY MANAGEMENT SYSTEM

Team Project | Dev Support — January 2026 - March 2026

- Developed a multi-interface library portal using React to provide role-specific, accessible experiences for students, teachers, and librarians.
- Built PHP API endpoints to automate manual book borrowing, returns, and reservation processes.
- Administered a centralized database to securely manage and rapidly retrieve library records and user accounts.
- Integrated an AI chatbot using Ollama and the Gemini API to enhance user support and automate system announcements.

WEB PORTFOLIO

Personal Project | Main Dev — September 2026 - October 2026

- Designed a responsive personal portfolio website to professionally showcase full-stack projects and hardware builds to prospective employers.
- Deployed continuous application updates utilizing Vercel and GitHub to maintain a modern, version-controlled online web presence.

EDUCATION

Bulacan State University - Sarmiento Campus
Bachelor of Science in Information Techonology | 2023 – Present

San Jose Del Monte National Trade School
Senior High School | 2021– 2023
- With Honors

San Jose Del Monte National Trade School
Junior High School | 2017– 2021
- With Honors

Bagong Buhay E Elementary School
Elementary School | 2011– 2017

TECHINICAL SKILLS

- **Tools & Languages:** Arduino IDE, Netbeans, Visual Studio Code, TypeScript, JavaScript (ES6+), React (TSX), HTML5, CSS3, Java, C#, C++
- **Databases & Cloud:** MySQL, Firebase
- **Networking & System Administration:** VMware Virtualization, Active Directory DomainServices (AD DS), DNS, DHCP, Cisco Packet Tracer (Hardware/Network Configuration)
- **Hardware & IT Support:** Embedded Systems, Microcontrollers, Sensor Interfacing, System Diagnostics, PC & Laptop Hardware/Software Repair

REFERENCE

- will provide upon request
